

Selling to consumer product makers? Join the IoT Infrastructure Pavilion @ CES 2024!

CES is one of the very largest trade events in the world, drawing more than 120,000 attendees – many are makers/designers of consumer products and supply chain professionals interested in IoT solutions. IoT is the backbone behind all connected consumer technology, and the IoT Infrastructure Pavilion will showcase the technology's best innovators and latest solutions.

Join the leading IoT solutions providers – secure your booth before we sell out.

Don't be left behind!

The IoT Destination at the Big Show

The IoT M2M Council is the exclusive organizer of the only pavilion and conference dedicated to IoT technology at CES 2024.

IoT Infrastructure Pavilion @ CES 2024 will be in the North Hall with **Vehicle Technology, Robotics, Digital Health, and Sustainability** as well as in the Westgate along side the **Design & Source pavilion**. It has become the IoT destination for qualified IoT leads.

IoT Newsdesk Live!

The IMC will also host the premier IoT experts in discussion panels and analyst interviews on the IoT Newsdesk Live soundstage in programming on the show floor.

Topics in 2023 included, 5G automotive, sustainability, and digital health.

Pricing

Raw Exhibit Space: \$48/ sq ft
